A research seminar at the Natural History Museum
by Professor Rod Page

17 March 2009

Flett Theatre

11.00 - 12.00

Refreshments will be served from 10.30

Rod Page is Professor of Taxonomy at Glasgow University. His research interests include informatics, systematics and host-parasite coevolution. He is a leader in the development of web-based informatics tools and phylogenetic software. In this seminar Rod will discuss how the web can help taxonomy and recent developments in the emerging field of biodiversity informatics.
